

## DESIGN PROJECT SITE UPDATE

**Last Updated: Thursday, September 13, 2010**

**Project Name:** Water Main Replacement Project FY 09-10

**Project Description:**

The scope of the Project includes designing the replacement of approximately 10,000 feet of water main located under the street surface at nine streets within the City. The City replaces about 1% of all water main lines every year to ensure proper water quality and reliability to City of Santa Barbara customers.

**Current Schedule:**

Estimated start of construction: December 2010

Duration of construction: 9 months
